

Co - Creating What's Next

The one size fits all approach to testing services doesn't fit anymore.

At Symbio, we partner with you based on where you are in the lifecycle of your mobile strategy, and structure our teams, services and location strategies accordingly.

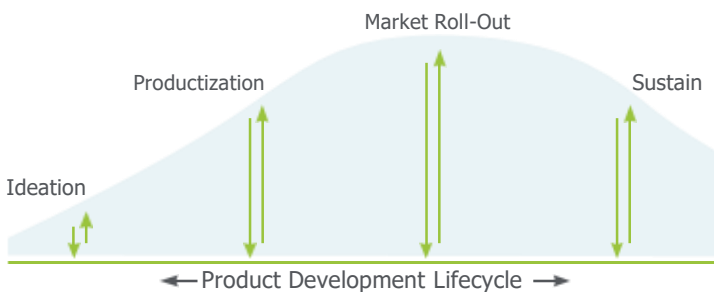

MOBILE TESTING – Delivering World-Class Products

The world of mobile testing is deep, broad, and full of pitfalls and opportunities. At Symbio, we are constantly streamlining our QA and testing processes to deliver the highest level of quality, reliability, responsiveness, and efficiency for our client's mobile testing requirements. With over 20 years of dedicated experience in the field of mobile testing, we have robust processes, strategies and methodologies, necessary tools and frameworks, to create leading development platforms. And, with the onset of the multiverse (multi-platform, multi-device, multi-lingual), the need to test accurately and precisely has never been greater.

Symbio supports quality assurance for mobile solutions across the entire product development lifecycle:

Symbio supports mobile solutions across the product development lifecycle:

Non-Functional Testing

- Performance testing
 - Memory leaks
 - Benchmarking
 - Power consumption
- Stress & Reliability testing
 - Endurance
 - Load test
 - MTBF
- Security testing
- Static and dynamic analysis

Functional Testing

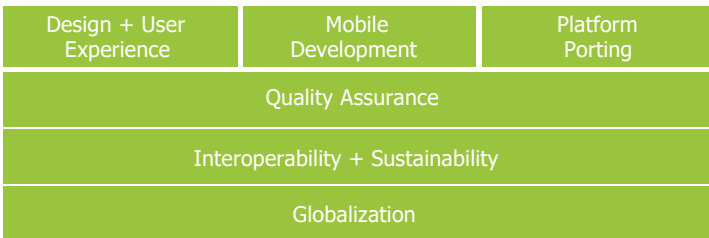

- Module, unit testing
- Integration testing
- System testing
- Acceptance testing
- Maintenance testing
- Exploratory testing (SBTM)
- Usability testing
- Localization testing with 80+ languages
- Interoperability testing
- Accessory testing

Test Automation

- Test tools & envs
- Test case scripting and development
- Test suites, Regression testing
- Robot-Aided Test Automation (RATA)

Certifications

- Google Android Auto 3PL certification
- Carrier pre-certification
- OS pre-certification
- Store Intake

We're The Ones Who Make It Work

Test Automation

As a leading global service provider for Mobile testing, we're committed to delivering the best solutions for our clients. We offer a variety of QA and testing processes for all types of mobile application needs.

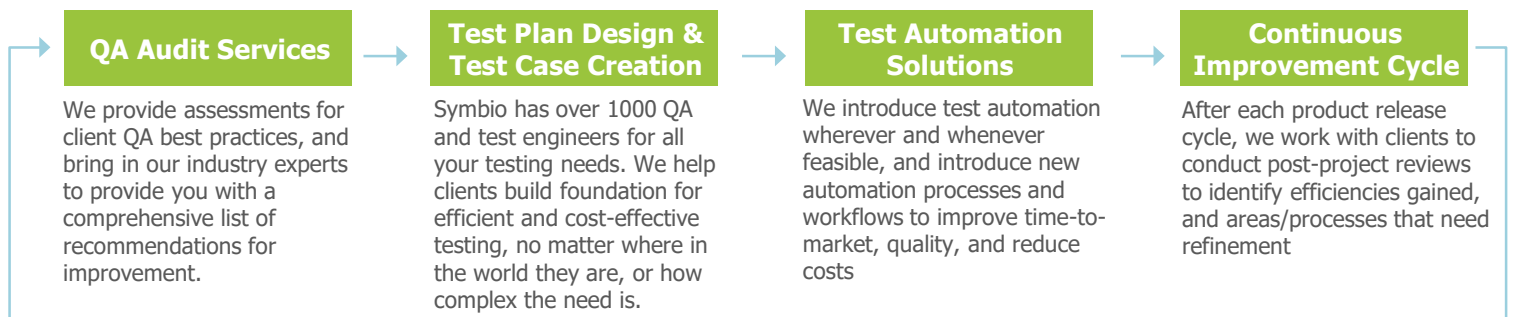

- Consumer usage patterns and demands for product & services are exponentially evolving
- Software must be built to account for multiple form factors, platform usage, and geographies

Symbio provides complete QA, Testing and Automation services, giving clients a multitude of benefits during the test, and post-test phases of product development.

- **Solution Accelerator** – Cross-platform mobile test automation
- **Integrated Environments** – Utilizing mobile test automation tools like RATA, SeLion
- **Reductions in Lines of Test Scripts** – The framework encases the implementation, exposing simple and easy-to-use functionality
- **Write & Run** – We offer the ability to write test scripts using Symbio's framework, exposing APIs used to develop platform-independent test scripts
- **Dual-Script Testing** – For multiple applications like iPhone, Android, Tablets and related devices
- **Parallel Testing** – Utilizing Selenium Grid, Sauce Labs Integration
- **Greater Scalability** – Integrate with TestLink, HP ALM, PoM, Jenkins
- **Leverage Testing Utilities** – Data Layer integration, Logging
- **Testing for Mobile Apps**
- **Testing for numerous interfaces**

WORLD-CLASS TESTING SERVICES – Analyze. Plan. Execute. Repeat.
